

Codebook

American Public Opinion on the Use of Military Force, 1980-2013

Richard C. Eichenberg
Tufts University
September 29, 2015

Introduction

This codebook documents the variable in the Stata data file RCE_USUOF_final.dta. The data were employed in the analysis that appear in several of my articles (Eichenberg 2003, 2005, 2016; see also 2007). In addition to the documentation below, further details on definition, operationalization, and coding appear on the following pages: Eichenberg (2003, pp. 122-125, 127-129; 2005, pp. 153-155, 161-163; see also 2006, pp. 4-8; 15-20).

A replication (.do) file for my 2016 ISQ article is contained in the replication materials that accompany the article.

Unit of Analysis and Sources of Data

The unit of analysis is an individual survey question concerning the past, present, or future use of military force by the United States. The questions were retrieved from a number of archives. I include only nationally representative probability samples of the entire population. The average sample size is 1059. The largest number of surveys came from the IPOLL database available to members of the Roper Center for Public Opinion Research at the University of Connecticut (until 2015). In addition, I retrieved surveys from archives at the Institute for Research in the Social Sciences at the University of North Carolina; the Inter-University Consortium for Political and Social Research; the Pew Center for the People and the Press; the Program on International Policy Attitudes; and the *Transatlantic Trends* surveys conducted by the German Marshall Fund.

Retrieving the Original Survey Question

Each of the survey questions in the dataset is coded for a number of characteristics of question wording (as described in the pages cited in the first paragraph above). However, researchers are free to code or re-code questions as they wish. For every question, the dataset includes a number of variables that will allow researchers to retrieve the question (usually from the iPoll database): the beginning and end dates of the survey; the organization sponsoring or conducting the survey; the sample size; and a brief phrase summarizing the wording of the question.

Types of Variables

The data file contains three types of variables:

Coded variables: codes for identifying information (sample dates and size for each question; polling organization) but most importantly codes for characteristics of question wording (mention of United Nations, casualties, assisting parties to civil conflicts, and many more)

Constructed variables: variables constructed from coded variables. Examples: year of survey extracted from sampling dates; principal policy objective constructed from constituent variables; party controlling White House; and others documented in this codebook below.

Responses to survey questions: % favor, % oppose, % n/o for total population, men, and women

The codebook on the following pages is divided into three sections, one for each of the three types of variables.

Coded Variables

epis2	episode recoded with Iraq War (#19) beginning on March 19, 2003 1 Lebanon 1983 2 Grenada invasion 3 Panama invasion 4 Nicaragua 5 El Salvador 6 Libya air strikes 7 Re-flag Kuwaiti tankers 8 Aid Afghan rebels 9 Gulf crisis and war 10 Bosnia 11 Confrontation with Iraq 1992-2003 12 North Korea nuclear confrontation 13 Haiti occupation 14 Somalia 15 Rwanda 16 Sudan/Afghan missile strikes 17 Kosovo 18 War Against Terror 2001-2013 19 Iraq War 2003-2013 20 Iran 2002-2013 21 Syria 2003-2013 22 Liberia 2003 23 Israel/Palestine 24 Dafur/Sudan 25 Lebanon 2006 26 Libya 2011
--------------	---

episode	Original episode number with Iraq War beginning 2002 (arbitrary)
begin	Beginning date of survey sampling (string)
end	Ending date of survey sampling (string)
edate	Ending date of survey sampling (Stata date format)
organiz	Organization conducting the survey (list of codes in Appendix 1)
samplen	Survey sample size

action	<p>Type of military action mentioned in survey question</p> <ol style="list-style-type: none"> 1 Military action (general) 2 air or missile strikes 3 naval forces 4 presence of troops 5 send troops 6 keep/maintain troops 7 increase troops 8 sell or send arms 9 war 10 unspecified action type 11 provide advisors or training
---------------	--

troop	<p>Is the actual number of <u>USA</u> troops or peacekeepers actually mentioned in the text?</p> <p>0. No Yes: enter <u>the actual number</u> that is mentioned; only USA troops</p>
phrase	<p>Type a three-4 word (max) phrase from <u>the question</u> regarding the action; ie, "take military action" "send US troops" or "conduct airstrikes". One word can be sufficient, ie, a question on "approve airstrikes" could just be "airstrikes". Obviously, try to capture the actual action being queried, and TRY to quote it identically if it is used identically or nearly so in later questions. Don't say "sending troops" then later "send troops"; stick with "send troops". They're essentially the same.</p>
ground	<p>Does the word "ground" appear in phrases involving troops/forces/action/combat in the question wording or not?</p> <p>1. Yes – the word "ground" appears 0 . No</p> <p><i>This will probably only apply to questions for which you assigned 4,5,6,7 above; I want to be able to clearly analyze the effect of this word. If the word "ground" in "ground troops/forces/whatever" appears, I want a "1". Otherwise zero.</i></p>

def_ally	<p>Does the question mention defending an ally or friend</p> <p>1.Yes 0.No</p> <p><i>I will mark virtually all of these; if I don't mark it "1", enter 0. This refers to defending "allies" from attack from Iraq, North Korea, and occasionally Serbia. The vast majority of these will be 0. Repeat: if I don't mark a 1, it's a 0. When I do mark "1", there should always be a notation for "PHRASE" above....ie, "defensd Kuwait".</i></p>
quirky	<p>This variables tags oddities in question wording (for example, departure from the standard that questions should be the "approve/agree/favor" type question).</p> <p>In addition, the code 2 signifies that it is a question that asks about the human cost of using force. This code is used to construct the variable anydeath, listed below.</p> <p>1.Yes; quirky wording 2. a "worth it" question 0.No</p> <p><i>We've worked hard to cull this collection down to "clean" questions for/against use of force. But I kept a few borderline questions with somewhat odd wording that I want to be able to identify/separate. I've marked all of these. Unless you see a Quirky=1, enter a 0.</i></p>

	<p><i>By definition, the vast majority will be 0. Code 2 if it is a question asking if the use of force is “worth the cost of human life”</i></p>
hypo	<p>Does the question pose a hypothetical, using “if”, “would you support” or any other <u>conditional</u> phrasing –as opposed to the concrete “do you support/favor”???</p> <p>1. Yes 0. No</p> <p>The answer will very frequently be yes, but humor me, and see below. I may have marked some of these, but many I did not. This job falls to you, so be attentive.</p>
temporal	<p>Does the question refer to a (potential) future action, an ongoing action, or a past action?</p> <p>1. Future action 2. Ongoing action 3. Past action 4. it’s not clear</p> <p>My sense is that most are 1 and 2, but there are 3’s as well. By definition, most of the conditional YES in hypo will be 1. Future here. I may have marked some of these, but many I did not. This job falls to you, so be attentive.</p>

multi	<p>Does the <u>question text</u> mention any multilateral organizations or allies or friends <u>Who will participate in the military action?</u></p> <p>1. Multinational/lateral/ international -- general 2. U.N./United Nations <u>specifically mentioned</u> 3. NATO/Western Allies/European allies 4. both UN AND NATO/European allies/others mentioned 5. Specific country (ie, “Britain”) 6. “allies” or “friends” “other countries” generally mentioned 0. no, none are mentioned</p> <p>This refers <u>strictly</u> to the question text (ie, forget what you know about the episode and who was involved). Stay literal and enter only if the above words are mentioned in the text.</p> <p><u>IMPORTANT NOTE: this does NOT apply if UN/other actors are target of a protective action by the US: see Protect peacekeepers below.</u></p>
--------------	---

mandate1	<p>Does the question very explicitly explain that the action is for the purpose of <i>enforcing a U.N. or similar mandate (or punishing its abrogation)</i>?</p> <p>1. Yes 0. No</p> <p><i>Most likely to occur for Iraq, & North Korea (ceasefire, weapons inspections), but may also come up in Bosnia (safe havens) or even Haiti.</i></p> <p>I am looking only for very explicit cues in question wording. Thus, “to enforce compliance with UN resolutions” <u>in the question wording</u> is a “yes”, but these words <u>have to appear</u>. If you happen to know a resolution was in effect at the time the question was asked, it is irrelevant unless it appears in the question. <u>I have marked all of these, but double check me</u></p>
helpend	<p>Does the question mention that the purpose of the action is to “help end” a conflict or ANY of the following “<i>stop the fighting/killing/violence/genocide/ maintain-keep order/stability between</i>”, “<i>put an end to bloodshed</i>” OR “<i>restore peace</i>” or “<i>restore stability</i>”.</p> <p>1. Yes 0. no</p>
takeside	<p>Does the question ask if the US or US+UN should assist one side in an internal conflict?</p> <p>1.yes 0. No</p> <p>Notes and Elaboration on this. I’ve marked all that I think should be 1; otherwise enter 0.</p>
assass	<p>Does the question mention/pose the assassination of a foreign leader?</p> <p>1. Yes 0. No</p> <p>This refers to killing a leader only; “changing a government” comes below; does NOT refer to attempt on Bush life in 1993 –Bush not foreign leader.</p>

<p>hussein</p>	<p>Does the question mention the name “Saddam Hussein” or “Hussein” or “Saddam” ?</p> <p>1. Yes</p> <p>0. No</p> <p><i>IF his name appears: 1; if not 0. Simple as that.</i></p>
<p>chggovt</p>	<p>Does the question mention in any way that the purpose of the action is to remove an existing government or apply pressure for the purpose of removing it?</p> <p>1. Yes</p> <p>0. No</p> <p><i>For the Haiti questions, the answer will almost always be “yes”, but it may come up elsewhere too (Iraq; Serbia). Obviously, if Assass is “Yes”, it is yes here too.</i></p>
<p>civdeath</p>	<p>Does the question mention the possibility of <u>civilian</u> deaths/casualties/human costs/suffering/collateral damage that might result(ed) from the military action discussed in this question? Note: this variable is used later to construct the variable anydeath</p> <p>1. Yes</p> <p>0. No</p> <p><i>Note: this does NOT refer to the suffering/deaths that may have <u>motivated</u> this action; it refers to the consequences for civilians of the action in this question itself.</i></p>
<p>mildeath</p>	<p>Does the question mention the possibility of US military deaths/casualties/human costs/suffering that might result(ed) from the military action discussed in this question? Note: this variable is used later to construct the variable anydeath</p> <p>1. Yes</p> <p>0. No</p>

<p>peackkeep</p>	<p>Does the question mention that the purpose of the action (providing/sending troops or other) is to contribute to/send troops to/ initiate "<u>Peace Keeping</u>" or "<u>enforcing/supervising</u>" a peace agreement?</p> <p>1.Yes</p> <p>0.No</p> <p>Basically, if the words "peace keeping" or "enforcing a peace agreement" appear, it should be "yes". The only exception is the immediately following: Study next question before starting this!</p>
<p>protect1</p>	<p>Does the question suggest that the purpose of the action is to protect/defend/support/help/aid /<i>evacuate/withdraw</i> Peacekeepers already there?</p> <p>1.Yes</p> <p>0.No</p> <p><i>Probably only Bosnia/Somalia/but well worth knowing. If the question refers to "sending providing peacekeepers, use peackkeep=1 Above & 0 here. This one should only be yes if the question is <u>protecting/moving/evacuating</u> peacekeepers already in place (in which case peackkeep above should be 0).</i></p>
<p>protect2</p>	<p>Does the question mention/suggest that the purpose of the action is to protect/defend/support/help/aid/ <u>Civilians</u>?</p> <p>1.Yes</p> <p>0.No</p> <p>I believe I have marked all of these, but double check me.</p>

<p>humanit</p>	<p>Does the question mention/suggest that the purpose of the action is provide/facilitate humanitarian relief/assistance (generally) or transportation, supplies, food, medical, etc. specifically?</p> <p>1.yes: the word “humanitarian” aid/assistance/relief appears generally</p> <p>2.yes: specific types of aid (food, medicine) are listed/mentioned</p> <p>0.no</p> <p><i>This may seem minor, but I bet there is a difference when specific types of aid (food, medicine, transportation are mentioned). In any case, an additional rule: <u>This should always be 1 if the word “humanitarian” appears in the question at all.</u> –although it can and should be 2 if that word is then elaborated with specific types of relief.</i></p>
<p>retaliat</p>	<p>Does the question suggest/mention in any way that the purpose of the action is to retaliate/revenge/punish for some prior action?</p> <p>1. Yes</p> <p>0.No</p> <p>Most if not all are already marked.</p>
<p>presname</p>	<p>Is <u>the current</u> President mentioned by name in the question text?</p> <p>1 Carter</p> <p>2. Reagan</p> <p>3. Bush Sr</p> <p>4. Clinton</p> <p>5. Bush II</p> <p>7. Obama [code 6 inexplicably skipped]</p> <p>0. No name at all</p> <p>Note the exception that Bush senior should not be coded in the case of the Iraq assassination attempt in 1993 –Clinton was President then.</p>

massdest	<p>Does the question text mention nuclear, chemical, biological, “atomic” or “weapons of mass destruction”?</p> <p>1.Yes</p> <p>0.No</p> <p>Pretty simple if you follow the literal rule: if it’s there, 1; if it’s not, 0.</p>
terror	<p>Do the words “terror/terrorism/terrorist” appear in the question text?</p> <p>1.Yes</p> <p>0. No</p> <p>Ditto</p>

wat_targ	<p>Target of action in war against terror</p> <p>1. Afghanistan/Usama Bin Laden</p> <p>2. Somalia</p> <p>3. other state mentioned as target</p> <p>0 . not WAT epis2~=18</p>
-----------------	--

Constructed Variables listed beginning on next page

Constructed Variables

PPO	<p>Principal Policy Objective</p> <ol style="list-style-type: none"> 1. Foreign policy restraint 2. Internal Political Change 3. Humanitarian intervention 4. Peace keeping 5. Mixed IPC/FPR <p>This variable was generated based on presence/absence of question wording in the variables described above (coded variables). For conceptual and operational definitions, see the following pages of my publications: Eichenberg (2003, pp. 122-125, 127-129; 2005, pp. 153-155, 161-163; see also 2006, pp. 4-8; 15-20) and the further elaboration in Appendix 2 of this codebook.</p>
FPR	Foreign policy restraint. Recoded dummy variable; 1 if PPO ==1; 0 otherwise
IPC	Internal political conflict. Recoded dummy variable; 1 if PPO ==2; 0 otherwise
PKEEP	Peace keeping. Recoded dummy variable; 1 if PPO ==3; 0 otherwise
HUM	Humanitarian intervention. Recoded dummy variable; 1 if PPO ==4; 0 otherwise
worthit	Dummy variable for questions asking if action is “worth the loss of life” or simply “worth it” ==1 if quirky ==2; 0 otherwise
general	Dummy variable for “general” reference to “military action”; ==1 if action ==1; 0 otherwise
aironly	Dummy variable when action is air or missile strikes, bombing; ==1 if action ==2; 0 otherwise

sell	Dummy variable when action is “selling or sending arms/assistance”; ==1 if action ==8; 0 otherwise
send	Dummy variable when action is “send/ing troops”; ==1 if action ==5; 0 otherwise
keepincr	Dummy variable when action is keep/maintain OR increase troops; ==1 if action ==6 OR action ==7; 0 otherwise
multi2	Dummy variable for ANY multilateral mention; ==1 if multi >0; 0 otherwise
UN	Dummy variable if UN mentioned in question; ==1 if multi ==2; 0 otherwise
NATO	Dummy variable if NATO mentioned in question; ==1 if multi ==3; 0 otherwise
humanit2	Dummy variable for any humanitarian mention; ==1 if humanit >0; 0 otherwise
anydeath	Dummy variable for any mention of casualties; ==1 if mildeath OR civdeath ==1 OR quirky ==2; 0 otherwise
RemoveSH	Dummy variable for mention of removing Saddam Hussein; ==1; 0 otherwise
troop2	Dummy variable for any mention of specific number of troops; ==1; 0 otherwise
presnam2	Dummy variable for any mention of specific president’s name; ==1; 0 otherwise

Survey responses

favor	% total population favor (agree/approve)
oppose	% total population oppose (disagree/disapprove)
no	% total population no opinion/refuse
men_fav	% men favor (agree/approve)
men_opp	% men oppose (disagree/disapprove)
men_no	% men no opinion/refuse

wom_fav	% women favor (agree/approve)
wom_opp	% women oppose (disagree/disapprove)
wom_no	% women no opinion/refuse
sexgap	$\text{men_fav} - \text{wom_fav}$

Generation of variable PPO (principal policy objectives)

The conceptual and operational definitions are described in the following pages of my publications: Eichenberg (2003, pp. 122-125, 127-129; 2005, pp. 153-155, 161-163; see also 2006, pp. 4-8; 15-20).

The coding of PPO for the war in Afghanistan (episode #18) was complicated by the fact that the PPO was not always clear from question wording. As I explained in my 2006 paper with respect to Afghanistan, two aspects of this war convinced me that otherwise unclassifiable questions from this episode should be treated as foreign policy restraint (PPO==1) through 2003. First, the publicity surrounding the September 11 attacks as the causis belli for the war against terror was extraordinarily intense –perhaps uniquely so in history. As a result, there seems little prospect that survey respondents did not know that the U.S. was retaliating for an attack against its soil and also attempting to prevent further attacks. It was, in short, about as clear a case of foreign policy restraint as one is likely to find.¹ Second, it remains possible to maintain the distinction between these general questions and other questions that do refer explicitly to other policy objectives.

After 2002, the framing of the war in Afghanistan became more varied, and I made no assumption about PPO beyond what was contained in question wording, so questions are often coded 5 (mixed IPC/FPR).

A few other ambiguities in question wording are described in the .do file that I employed to process and clean the original data collection. The file (PPO_clean2.do) is included in the replication package. **Note:** the commands in this file have already been executed and the results saved in the data file.

¹ This is not to say that the attack was unequivocally justified or wise; views will differ on these questions. Rather, my argument is that, unlike generally stated survey questions during other conflicts, one can reasonably assume that survey questions about the attack against Afghanistan would be interpreted by respondents as part of an American intention to protect its security interests, that is, as a case of foreign policy restraint.
